SUMMARY

B.Tech CSE student with skills in **Frontend Development**, **AI Engineering**, and **Generative AI**. Experienced in building responsive web applications using HTML, CSS, JavaScript and implementing **AI/ML algorithms** for intelligent, data-driven solutions. Seeking opportunities to grow as an **AI Engineer** while contributing to real-world projects.

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, JavaScript, React (Basic).
- **Programming Languages:** Java, Python.
- **AI / ML:** Machine Learning Basics, Python for AI,Data Handling
- **Tools:** Git, GitHub, VS Code, Jupyter Notebook
- **Databases (Basic):** MySQL
- **Other:** Problem Solving, Debugging, API Integration (Basic)

PROFESSIONAL SKILLS

- Communication Skills
- Team Collaboration
- Problem Solving
- Open Source Contribution
- Technical Skills
- Adaptability & Quick Learning
- Time Management
- Analytical & Critical Thinking

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering **July 2023 - Present**
Sam Higginbottom University of Agriculture ,Technology and Sciences

- **Core subjects:** Data Structures, Operating Systems, DBMS, Computer Networks
- Focus on **AI Engineering, Machine Learning, and Frontend Development**

Intermediate (12th Grade) **84% | Feb-2023**
RPM Academy | CBSE

ACADEMIC PROJECTS

Project Title: Patient Performance Prediction (Machine Learning) | **Link**

- Developed a Machine Learning model using Python to analyze and predict outcomes.
- Performed data preprocessing, feature selection, and model training.
- Evaluated model performance using accuracy and basic ML metrics.
- Gained practical exposure to AI/ML algorithms and data-driven problem solving.

Project Title: Personal Portfolio Website(Frontend Web Development) | **Link**

- Designed and developed a responsive portfolio website using HTML, CSS, and JavaScript.
- Implemented clean UI design with mobile and desktop responsiveness.
- Showcased skills, projects, and contact information effectively.

Project Title: Advanced Calculator (CLI-Based Python Application) | **Link**

- Designed and developed a command-line based calculator implementing structured programming concepts.
- Integrated advanced mathematical operations using Python's math module.
- Demonstrated understanding of algorithm design, control flow, and modular programming.

Project Title: Recommendation System (Mini Project)

- Built a basic recommendation system using collaborative filtering.
- Recommended items based on user preferences and similarity scores.
- Strengthened understanding of ML algorithms and data patterns.

ADDITIONAL INFORMATION

- **Languages:** English , Hindi.

Certifications:

- Generative AI Certification **(Google)** | **link** **Dec -2024**
- Web Development Workshop Conducted by **Techfest , IIT Bombay** | **link** **Dec -2024**
- National Workshop on Research Methodology and Data analysis Through **SPSS** And Sigma Plot Certification **Oct -2024**
- Certification of Completion of ML Intern and LOR | **Future Interns** **Nov -2025**
