Divyaratann Srivastava

Agentic AI Developer | Generative AI & LLMs | AI Full-Stack Developer | Python | REST APIs

15B Gangotri Nagar, Prayagraj • 9792085957 • divyratan2703@gmail.com

@Divyaratann Srivastava /Divyaratann Srivastava

SUMMARY

Computer Science undergraduate focused on Generative AI, LLM-powered applications, and Agentic AI development. Hands-on experience with Python, LLM APIs, prompt engineering, RAG concepts, REST APIs, API integration, and full-stack development using React and JavaScript. Experienced in building AI/ML and full-stack applications and integrating APIs into practical software solutions. Interested in developing AI agents, tool-using LLM applications, RAG-based systems, and intelligent automation solutions.

TECH STACK

- **AI / Generative AI:** Generative AI, LLMs, OpenAI API, Gemini API, Prompt Engineering, RAG,AI Agents, API/Tool Integration
- **Programming Languages:** Java, Python.
- **Machine Learning:** Machine Learning,Scikit-learn, NumPy, Pandas, Matplotlib.
- **Full Stack Development:** React, HTML5,CSS3, JavaScript, REST APIs, API Integration, Node.js, Express.js.
- **Tools:** Git, GitHub, VS Code, Google Colab, Jupyter Notebook.
- **Databases :** MongoDB,MySQL, Mongoose

PROFESSIONAL SKILLS

- Problem Solving
- Analytical Thinking
- Communication
- Team Collaboration
- Quick Learning
- Debugging
- Open Source Contribution
- Technical Skills
- Adaptability & Quick Learning
- Analytical & Critical Thinking

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering — **July 2023 - Present**
Sam Higginbottom University of Agriculture ,Technology and Sciences

Intermediate (12th Grade) — **84% | Feb-2023**
RPM Academy | CBSE

Intermediate (10th Grade) — **89% | Feb-2023**
RPM Academy | CBSE

ACADEMIC PROJECTS

Project Title: 1. StrictAttend – Student Attendance Management System | Link

- Developed a centralized attendance management system using Node.js, Express.js, MongoDB and REST APIs.
- Implemented JWT-based authentication, role-based authorization, admin approval and secure password hashing.
- Built APIs for student, subject, semester, class and attendance management.
- Implemented automated attendance calculations, reporting and CSV export.
- Integrated frontend and backend through REST APIs with protected resources.

Project Title: 2. AI Research Assistant – Agentic AI Project | Link

- User gives a research topic
- AI breaks task into smaller steps
- Searches/reads relevant information
- Uses tools/APIs
- Summarizes information
- Generates final structured report
- Maintains context
- Uses RAG for document-based questions

ACADEMIC PROJECTS

Project Title: 3.Patient Performance Prediction (Machine Learning) | Link

- Developed a Machine Learning model using Python to analyze and predict outcomes.
- Performed data preprocessing, feature selection, and model training.
- Evaluated model performance using accuracy and basic ML metrics.
- Gained practical exposure to AI/ML algorithms and data-driven problem solving.

Project Title: 4.Recommendation System (Mini Project) | Link

- Built a basic recommendation system using collaborative filtering.
- Recommended items based on user preferences and similarity scores.
- Strengthened understanding of ML algorithms and data patterns.

Project Title: 5.Personal Portfolio Website(Frontend Web Development) | Link

- Designed and developed a responsive portfolio website using HTML, CSS, and JavaScript.
- Implemented clean UI design with mobile and desktop responsiveness.
- Showcased skills, projects, and contact information effectively.

ADDITIONAL INFORMATION

- **Languages:** English , Hindi.

Certifications:

- Generative AI Certification **(Google) | link** **Dec -2024**
- Web Development Workshop Conducted by **Techfest , IIT Bombay | link** **Dec -2024**
- National Workshop on Research Methodology and Data analysis Through **SPSS** And Sigma Plot Certification **Oct -2024**
- Certification of Completion of ML Intern and LOR **| Future Interns** **Nov -2025**
